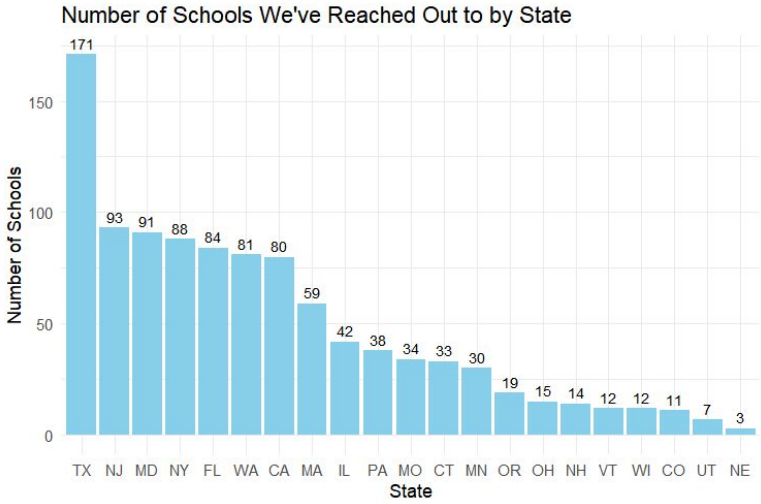
Last Updated: 8/9/2024

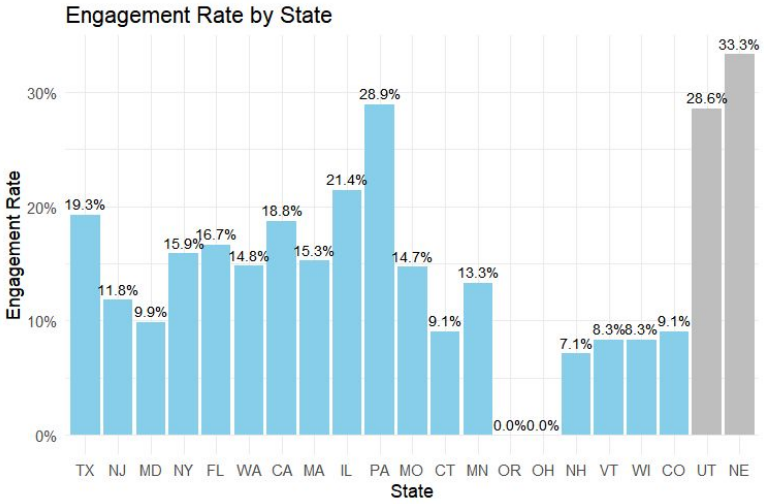
Abstract

- **Objective**: To evaluate our current strategies and identify opportunities to enhance school engagement and increase the likelihood of connecting students with our services.
- **Key Findings**:
  - **State:** There is high engagement from schools from Pennsylvania and Illinois. California makes up the largest number of schools that connected us with a student.
  - **Tuition**: Schools with higher tuition are more likely to engage.
  - **Role**: Learning Specialist and Directors are more likely to engage and connect us with students.
  - **Day & Time**: There is high engagement from Emails Sent on Wednesday, 9am and 12pm.
  - **Received Email Count**: Schools that sends us more emails are more likely to connect us with students.

School Engagement

States & Engagement

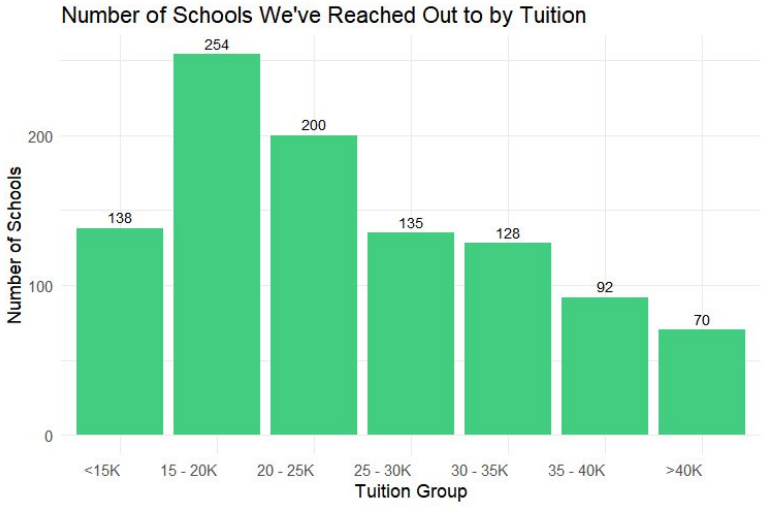


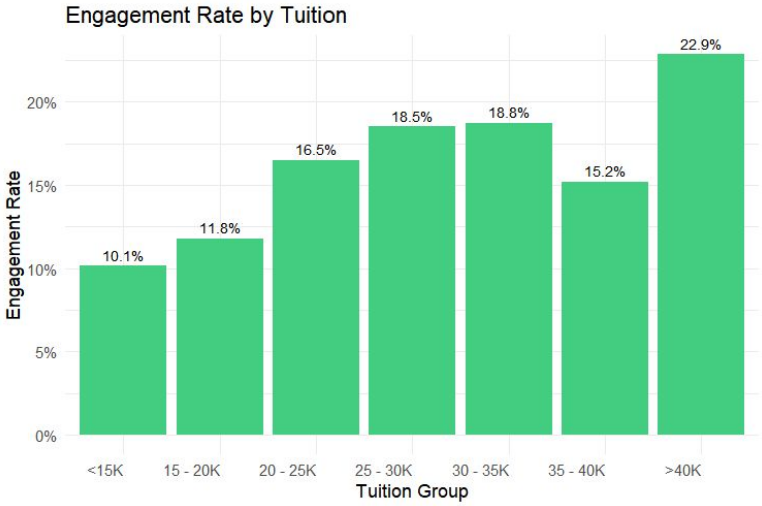


- Texas by far have the highest number of school we reached out to and with good engagement rate.

- High engagement from PA and IL schools suggesting that we should outreach to them more.
- No engaged school from Ohio and Oregon so far.

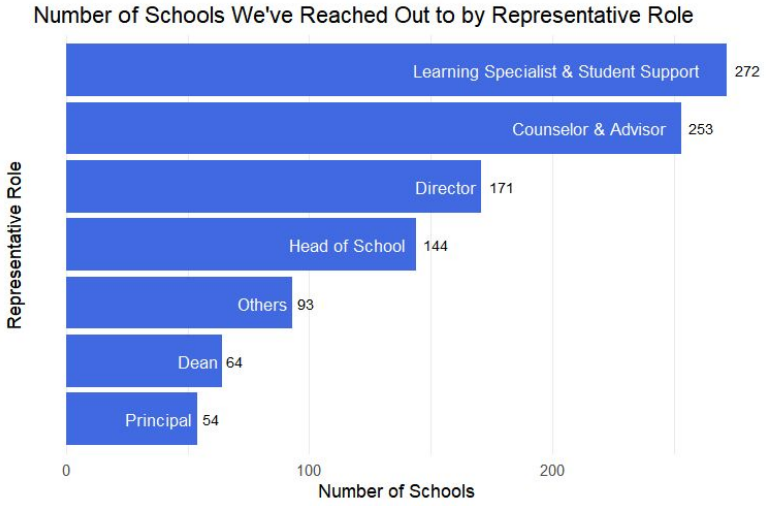
Tuition & Engagement

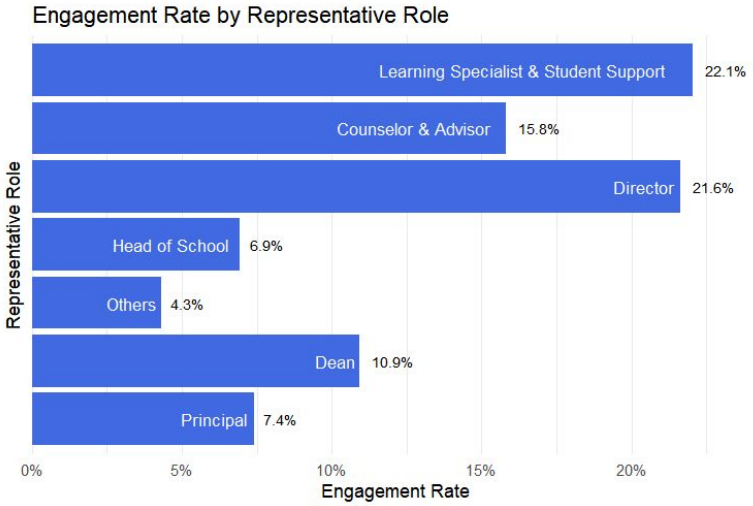




- Tuition are taken from estimates for 2024 - 2025 school year
- High engagement from school with higher tuition suggesting that we should outreach more to them

Role & Engagement

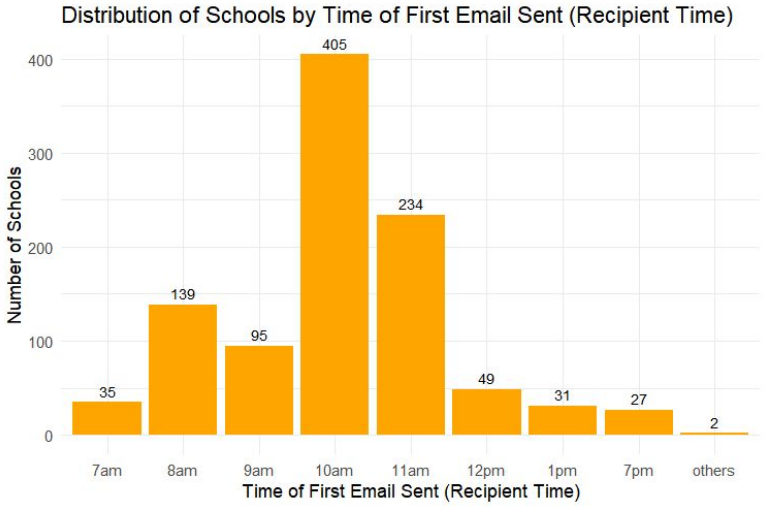


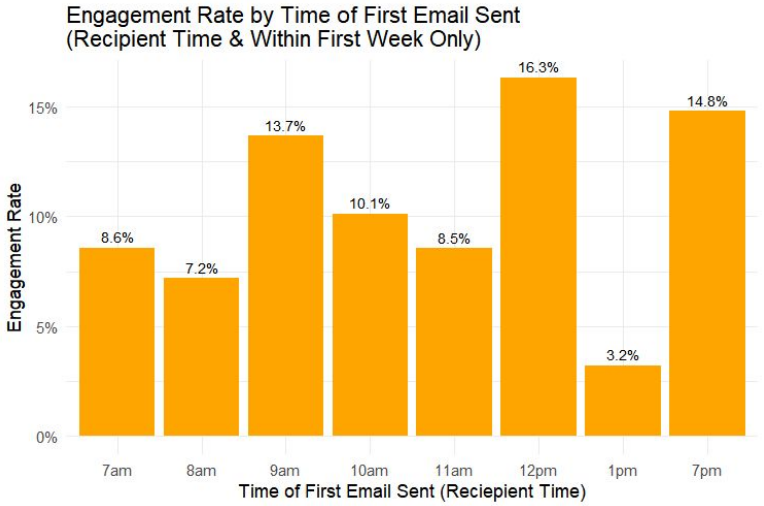


- Due to us targeting Learning Specialist as our primary contact person, it is the most common role.

- High engagement from Learning specialists and Directors
- We should at least target the roles presented here as there are little engagement from other roles.

Time of First Email Sent & Engagement

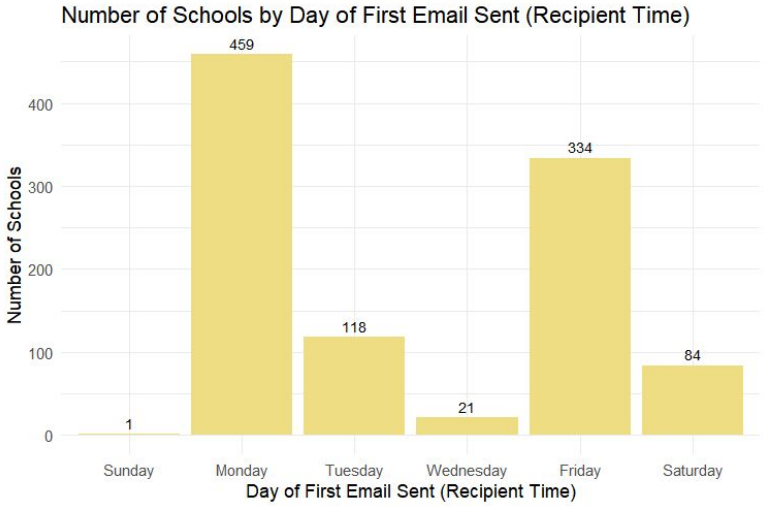


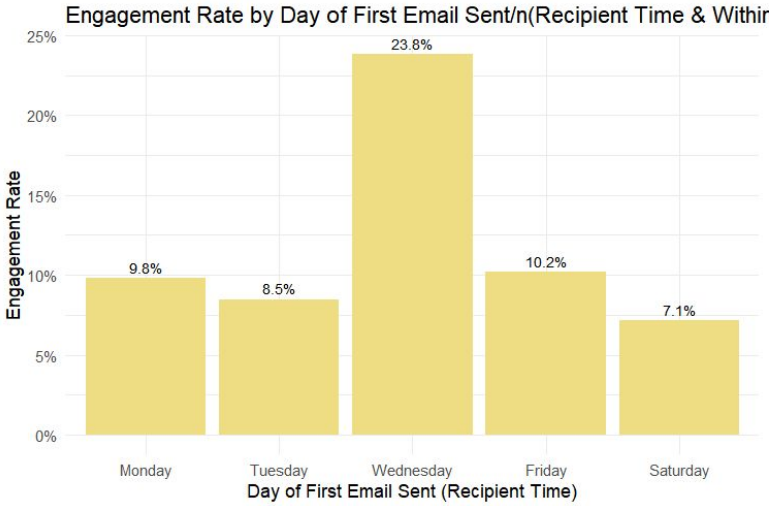


- 10am and 11am is the most common time schools receive their first email from us.
- We can try sending more email

- Graph only show 100 schools that responded within the first week out of 156 total engaged schools

Day of First Email Sent & Engagement

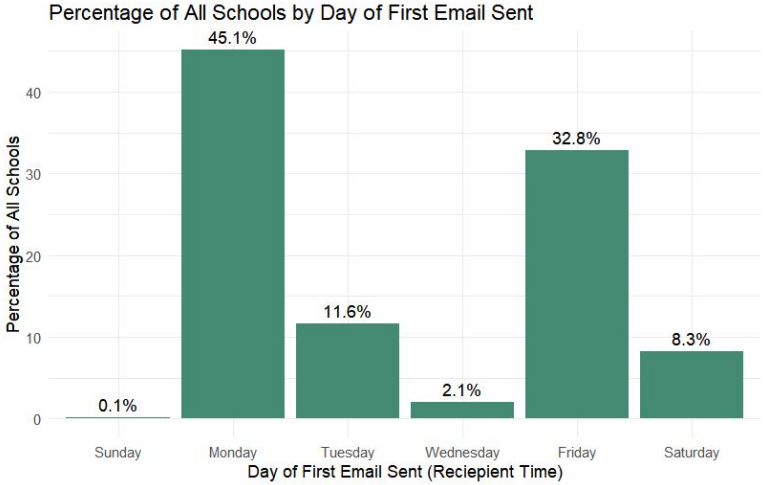


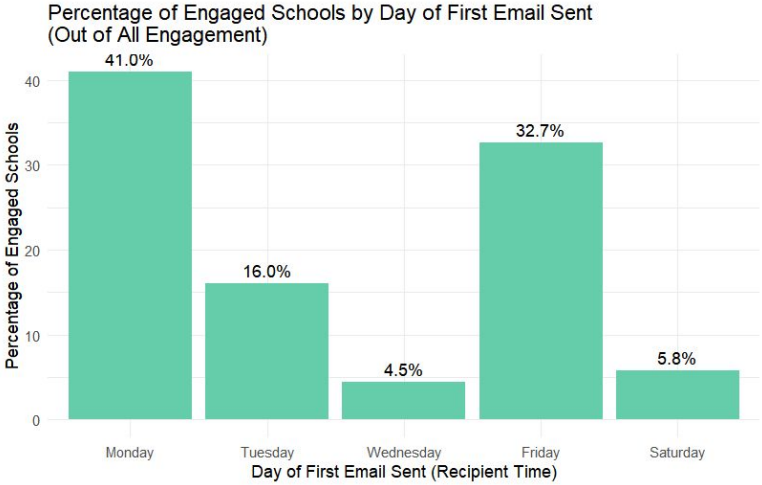


- Monday and Friday makes up most of the day of our first email sent.
- The engagement rate for most days are relatively similar.

- With high engagement rate on Wednesday, we should experiment sending emails on Wednesday and observe changes in engagement.

Day of First Email Sent & Engagement

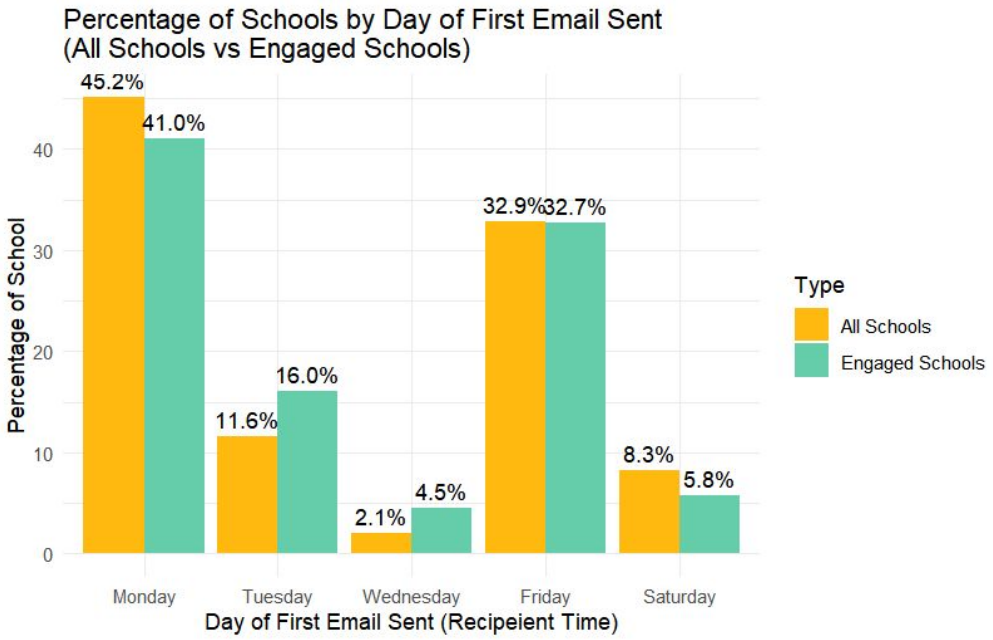




- These are percentage for each day of the week for all schools we have sent our first email to.

- These are percentage for each day of the week for all engaged schools we have sent our first email to.

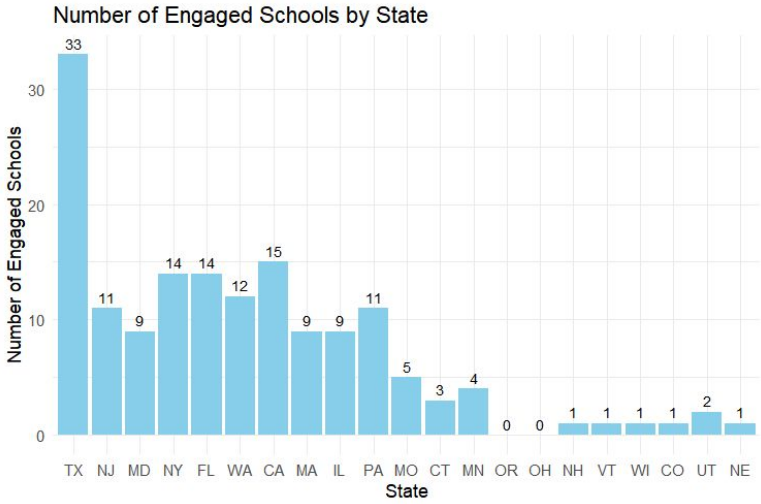
Day of First Email Sent & Engagement

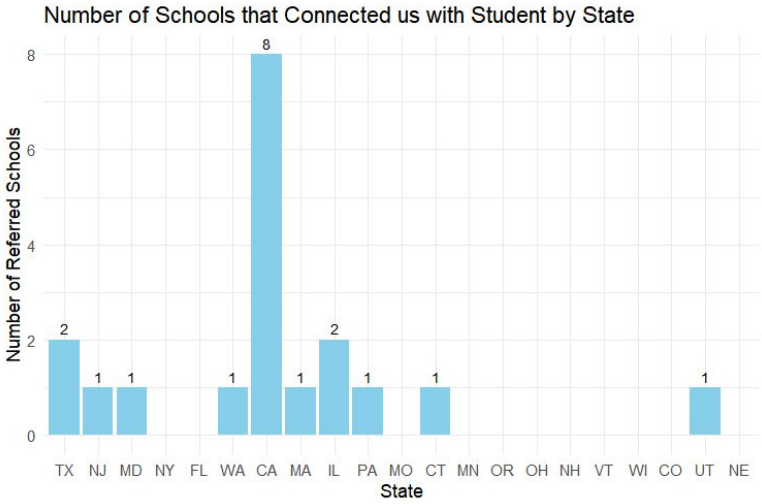


- This graph combines the two previous graph for easier comparison.
- Sunday is taken out due to low number and no engagement.

Schools Connecting Us with Student

State

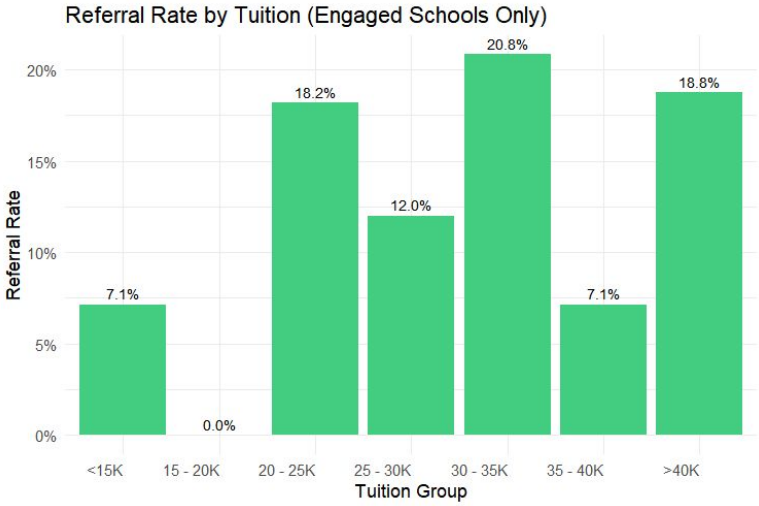


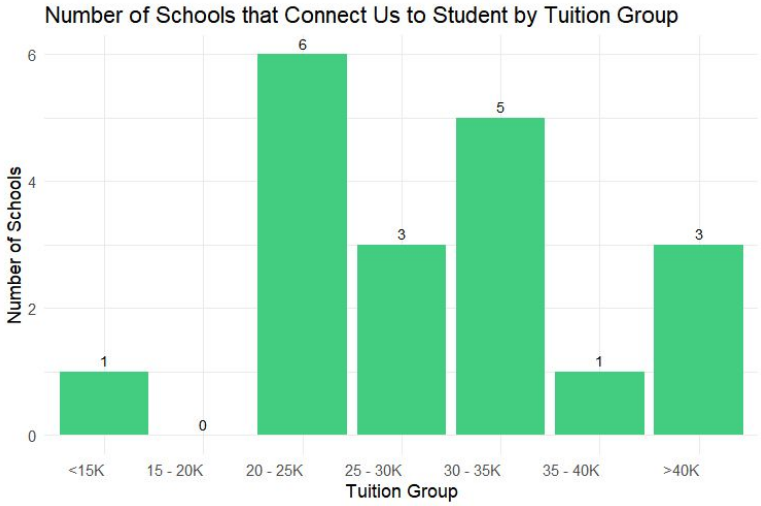


- Texas remains the first in number of engaged school but only 2 schools in Texas have connected us to a student.
- IL & PA have connect us to students despite lower outreached numbers.

- 19 school have connected us to at least one student.
- California makes up almost half of the number suggesting that it should be our main target.

Tuition

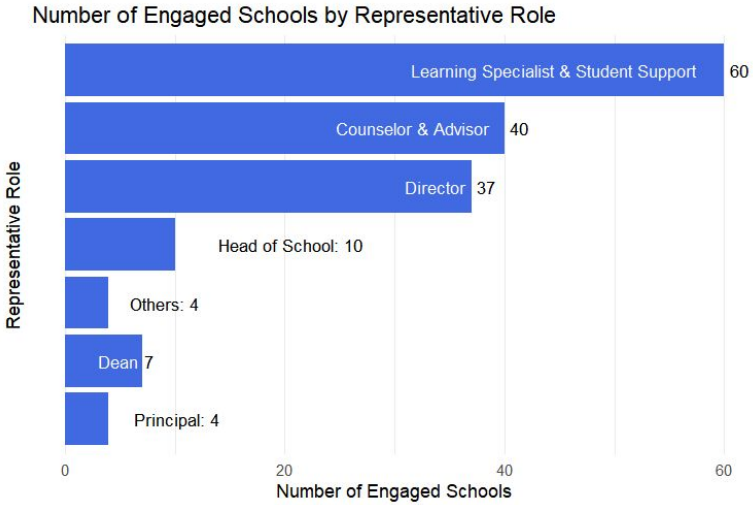


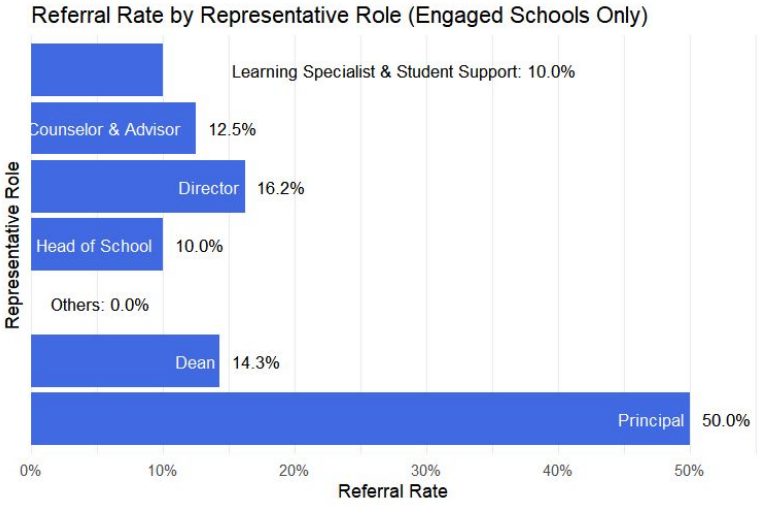


- No school from the 15 - 20K has connected us to a student so far.
- Schools in the 20 - 25K and 30 - 35K range makes up the majority of the total number of school that have connect us to a student.

- The data suggests that we should prioritize outreaching schools with more than 20K tuition per school year.

Role



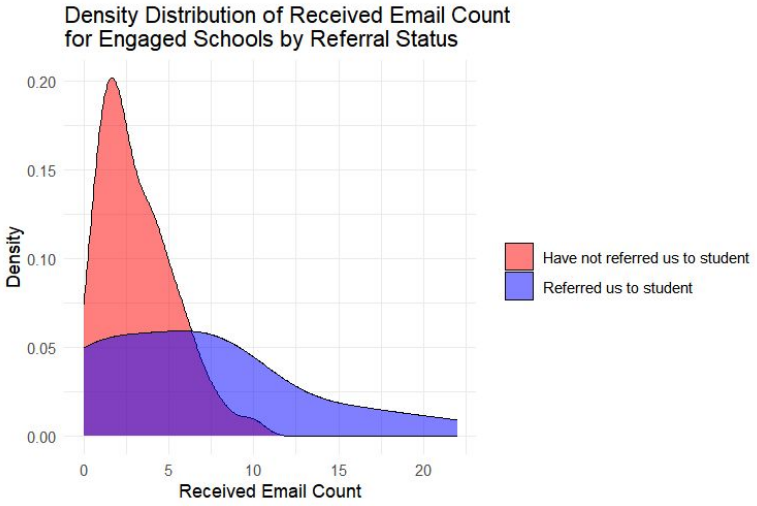


- Due to high engagement rate, Directors and Counselors & Advisors are similar in numbers here despite we reaching out to about 1.5 more schools for Counselors & Advisors than Directors.

- Along with Learning Specialist, we should also target Directors as they are more likely to engage and connect us to a student than most of the other roles.

Received Email Count

- Graph includes auto emails however this does not affect the trend significantly.
- While there is an overlap, the graph shows that schools that have connected us with a student generally send us more email.
- Based on our model, every additional email received from an engaged school mean that the school is 41.6% more likely to connect us with a student.



Conclusion

- Reach Out to more schools in Pennsylvania and Illinois.
- Focus on schools with higher tuition (more than 20K)
- Target Learning Specialist and Directors as our main contact person from the schools
- Experiment sending more emails on Wednesday, 9am or 12pm and observe engagement.

Thank You
